POLICY: SECURITY

The Board of Education believes that the buildings and facilities of this
district represent a substantial community investment. The Board directs the
development and implementation of a plan for district security to protect that
investment.

The district security program will include: the maintenance of facilities
secure against unwelcome intrusion; protection against fire hazards and
faulty equipment; and the observation of safe practices in the use of
electrical, plumbing, and heating equipment. The Board directs close
cooperation of district officials with local law enforcement officers, fire
fighters, the sheriff's office, and insurance company inspectors.

Personal access to school buildings and grounds outside the hours school is
in session shall be limited to personnel whose presence in the facility has
been approved by the administration. A code control system will be
maintained to limit building access to authorized personnel and guard
against the potential of intrusion by unauthorized persons.

Building records and funds shall be kept in a safe place and under lock and
key as appropriate and necessary.

Protective devices designed to be used as safeguards against illegal entry and
vandalism may be installed when appropriate. The Board may approve the
employment of security guards in situations in which special risks are
involved.
