POLICY: COMPUTER/INTERNET ACCEPTABLE USE POLICY AGREEMENT

Overview

Access to information is fundamental to citizenship and the foundation for further educational attainment. The Board generally supports access by staff and students to educational technology that allows rich information resources along with the development of appropriate skills to analyze and evaluate such resources. Our goal in providing educational technology to teachers, staff and ultimately students, is to promote educational excellence in Springfield Public Schools by facilitating resource sharing, innovation and communication. Any use of this educational technology and/or electronic communication that substantially disrupts or interferes with the orderly operation of the school or the rights of other pupils will not be tolerated in or outside of the school facilities or school day.

The Internet, for example, is an electronic communications network that provides vast, diverse and unique resources. To support the proper delivery of information via the Internet, the District has in place filtering software. Filtering software, however, is not 100% effective; while filters make it more difficult for objectionable material to be received or accessed, filters are not a solution in themselves. It is the user’s responsibility not to initiate access to materials that are inconsistent with the goals, objectives and policies of the educational mission of the District. The Board believes that the benefits to staff and students from access in the form of information resources and opportunities for collaboration exceed the disadvantages.

Internet access is coordinated through a complex association of government agencies, and regional and state networks. Recognizing that the Internet is neither a regulated nor a policed entity, the Board requests that students and staff agree to use this resource of information as an aid in the learning according to the guidelines set forth. Therefore, the smooth operation of this resource relies upon the proper conduct of the end users who must adhere to these strict guidelines. These guidelines are provided so that users are aware of the responsibilities they are about to acquire. In general, this requires efficient, ethical and legal utilization of the equipment, computers, software and network resources.

Terms and Conditions

The use of equipment, computers, network resources and the Internet is a privilege, not a right, and inappropriate use will minimally result in the suspension and/or cancellation of those privileges. No reasonable expectation of continued use or access shall exist. The administration, faculty and staff of the Springfield Public Schools may deny, revoke or suspend specific user accounts/access. Violation of the terms of the policy may also result in more severe penalties as deemed necessary.

If you feel you can identify a security problem on the Internet, you must notify a system administrator or faculty member. Do not demonstrate the problem to other users. Do not use another user’s account or share your account. Doing so will result in the loss of privileges for both parties.

10. Any problems that arise from the use of an account are the liability or responsibility of the account holder or user. All account holders or users hereby release Springfield Public Schools from any and all claims or damages of any nature arising from the access, use, or inability to access or use computers or the network system and by obtaining an account or use of the computers or network system agree to such and agree to indemnify and hold Springfield Public Schools harmless from same.
